Introduction

Congratulations on purchasing Transcend's Wi-Fi SD card that instantly adds wireless capability to your digital camera so that you can wirelessly stream digital photos and videos to your iPad, iPhone, Android, and other Wi-Fi enabled devices. Thanks to the use of a free downloadable App, developed for use with Apple iOS and Android devices, the Wi-Fi SD card is able to organize all of your photos and videos ready for easy playback. Up to 3 devices can access content from the Wi-Fi SD card at the same time, making it easier than ever to share your favorite digital files with friends and family. This User Manual will give you step-by-step instructions and advice to help you get the best experience from your new device. Please read it carefully before using the Wi-Fi SD card.

Package Contents

Wi-Fi SD Card

RDP5 card reader

Quick Start Guide and Warranty Card

Features

- View photos (JPG, BMP, PNG, RAW*)
- Playback videos** (AVI, MOV, MP4, M2T, MTS, M2TS)
- Supports iOS, Android, Windows, Linux, and Mac OS X
- Mobile App for iOS and Android devices
- Instantly share photos and videos wirelessly
- Shoot & View on iOS and Android devices
- Fully compliant with the SD 3.0 standard
- SDHC Class 10 speed rating

* Wi-Fi SD Card must have firmware version 1.8 or later to support RAW image files.

**For video streaming, the following resolution and video bit rate is recommended:

Resolution: HD-720p 1280x720@30fps, Video bit rate: 1472kbps.

System Requirements

Operating system requirements for uploading files from your computer to Wi-Fi SD:

- Microsoft Windows® XP
- Microsoft Windows Vista®
- Microsoft Windows® 7
- Microsoft Windows® 8
- Mac® OS X 10.5 or later
- Linux® Kernel 2.4 or later

Device requirements for running the Wi-Fi SD App:

- iPhone / iPad mini / iPad with iOS 7.0 later.
- Android device with Android 2.3 later.

Apple, iPhone and iPad are trademarks of Apple Inc. App Store is a service mark of Apple Inc.

Wireless performance depends on environment and distance from device or hotspot. To obtain the best possible connection speed, try adjusting the location and orientation of the Wi-Fi SD card.

Please **DISABLE** power saving (automatic power off) on your camera for a better user experience.

Installing the Wi-Fi SD App

Developed specifically for iOS (iPhone/iPad) and Android devices, the free to download Wi-Fi SD App allows you to wirelessly browse and download photos and videos stored on the Wi-Fi SD card, and customize wireless network settings.

Installing the App on an iOS device:

1. Using your iOS device, open the App Store and search for the Wi-Fi SD App.
2. Select the Wi-Fi SD App.
3. Tap to complete installation.

Installing the App on an Android device:

1. Using your Android device, open Google Play (for Kindle Fire users, please open the Amazon Appstore) and search for the Wi-Fi SD App.
2. Select the suitable Wi-Fi SD App.
3. Tap **Install** to complete installation.

Once installation is complete, the App will be displayed on the home screen of your device. To begin using the App, please see **Using the Wi-Fi SD App**.

Connecting to the Wi-Fi SD Card using iOS and Android Devices

To wirelessly access Wi-Fi SD card digital content on your iOS/Android device, you must first connect to the Wi-Fi SD card's dedicated wireless network.

Direct Share

(Peer-to-peer connection with iOS/Android device(s))

Direct Share mode allows you to browse photos and videos stored on the Wi-Fi SD card on your iPhone/iPad/Android device. When connected to the Wi-Fi SD card in Direct Share mode, your device will not have Internet access.

(On your camera)

1. Insert the Wi-Fi SD card and power-on the camera. (For directions on inserting an SD card into your camera, please see your camera's user manual.)

By default, the Wi-Fi SD card's wireless network signal will automatically broadcast in Direct Share mode once the camera is powered on. (To change the preferred default startup mode, please see the **Settings** section for detailed instructions.)

(On your iOS device)

2. Tap **Settings**, then **Wi-Fi**.
3. Under **Choose a Network...** select **WIFISD**. (After turning on the camera, please wait around 25 seconds for the network to appear. Default Wi-Fi security key: '12345678'. To change the default SSID and setup a Wi-Fi security key, please see the **Settings** section for detailed instructions.)

(On your Android device)

2. Tap **System Settings**, then **Wi-Fi**.
3. Under **Wi-Fi**, select **WIFISD**. (After turning on the camera, please wait around 25 seconds for the network to appear. Default Wi-Fi security key: '12345678'. To change the default SSID and setup Wi-Fi security key, please see the **Settings** section for detailed instructions.)

Internet Mode

(Connect with iOS/Android device(s) and Internet hotspot)

Internet mode allows you to browse photos and videos stored on the Wi-Fi SD card on your iPhone or iPad while connected to an Internet hotspot. In this mode, your device has Internet access, allowing you to upload and share photos online.

Internet hotspot setup:

Before you can use the Wi-Fi SD card in Internet mode, you must be within range of an Internet hotspot to enter the network details.

1. While connected to the Wi-Fi SD card in Direct Share mode (see previous section for instructions), launch the Wi-Fi SD App from your iOS/Android home screen.
2. Tap **Settings** and enter the admin username and password, then tap **Internet Mode**.

Note: The default username and password are both **admin** (all lower case)

3. Enter the SSID and password of the Internet hotspot and tap **Done**.

General use:

(On your camera)

1. Insert the Wi-Fi SD card into your camera. (For directions on inserting an SD card into your camera, please see your camera's user manual.)
 2. Follow the steps in the **Direct Share** section to connect to the Wi-Fi SD card, and then launch the Wi-Fi SD App.
 3. Tap **Settings** and enter the admin username and password, then tap **Switch Connection Mode**.
- Note:** The default username and password are both **admin** (all lower case)
4. Tap **Internet Mode**, then tap **Apply**.

Note: By default, the Wi-Fi SD card's wireless network signal will automatically broadcast in Direct Share mode once the camera is powered on. (To change the preferred default startup mode to Internet Mode and skip steps 2-4 above, please see the **Settings** section for detailed instructions.)

(On your iOS device)

5. Tap **Settings**, then **Wi-Fi**.
6. Under **Choose a Network...** select the SSID of the Internet hotspot you set up in previously while in Direct Share mode.

(On your Android device)

5. Tap **System Settings**, then **Wi-Fi**.
6. Under **Wi-Fi**, select the SSID of the Internet hotspot you set up in previously while in Direct Share mode.

Note: If the Wi-Fi SD card can't connect to the Internet hotspot after about 1 min, it will automatically switch to Direct Share mode.

Note: Some hotspots may require authentication via a web browser. In this case, the Wi-Fi SD card will not have Internet access while connected in Internet mode, and therefore you will not be able to upload and share photos online.

Connecting to a Smartphone Personal Hotspot

By using its personal Wi-Fi hotspot function, a smartphone can share its wireless data connection with the Wi-Fi SD card via Wi-Fi. In any location that the smartphone has a mobile Internet connection, the smartphone acts as an Internet hotspot, allowing you to share photos over the Internet instantly.

Smartphone personal hotspot setup:

1. While connected to the Wi-Fi SD card in Direct Share mode (see previous section for instructions), launch the Wi-Fi SD App from your iOS/Android home screen.
2. Tap **Settings** and enter the admin username and password, then tap **Internet Mode**.
Note: The default username and password are both **admin** (all lower case)
3. Enter the SSID and password of the smartphone's hotspot and tap **Done**.

General Use:

1. Insert the Wi-Fi SD card and power-on your camera.
2. If the default startup mode is Internet Mode then the Wi-Fi SD card will connect to the hotspot automatically. Otherwise, go to **Settings** -> **Switch Connection Mode** and select **Internet Mode**, then tap **Apply**.
3. Turn on the personal Wi-Fi hotspot feature of the smartphone. The Wi-Fi SD card will connect automatically.

Using the Wi-Fi SD App on iOS Devices

When your iOS device and Wi-Fi SD card are connected wirelessly in Direct Share or Internet Mode (via Internet hotspot or smartphone personal hotspot), you can browse content using the Wi-Fi SD App. The following sections provide instructions on how to view and playback your digital content using the App.

Launch App from the iOS device

Wi-Fi SD home screen

First Time Quick Setup

When the Wi-Fi SD App is launched for the first time while connected in Direct Share mode, the Quick Setup Wizard will appear and guide you through the Wi-Fi SD setup process. The quick setup guide appears on first use only, however you can change the settings and add an Internet hotspot at any time via the settings menu.

Step1. Modify the Wi-Fi SD SSID and Key or tap **Next** to skip this step

Step2. Add an Internet Hotspot SSID and security key, then tap **Next**

Step3. Tap Save to save the configuration

Browse

Viewing Photos

1. Select the desired photo to display.
2. Use your finger to swipe sideways through each photo as a slideshow

Browse photo file list, tap to select

Photo displayed in portrait mode

Downloading Files to Your iOS Device

The Wi-Fi SD App allows you to select multiple files to download to the App folder for playback when not connected to the Wi-Fi SD card's wireless network.

1. From the file list, tap the **Select** button.
2. Select the desired files to download by tapping the check box next to each file or tap **All Photos** to select all files.
3. Tap **Download To Camera Roll** to download it from the Wi-Fi SD card to the iOS device camera roll. And tap **Download To App Folder** to download photos to App Folder.

Select desired photos from the file list

Select a download option

Share Photos via Other Apps

1. To share a photo via other Apps, tap the desired photo from the file list.
2. Tap the open-in button
Note: The **Share** button only appears in **Internet Mode**
3. Tap an available App installed in your iOS device.
4. The desired photo will automatically be attached to the selected App.

Tap the **Open-In** button

Shoot & View

Shoot & View allows you to view the latest photo taken with your camera on your iOS device instantly.

From the home screen, tap **Shoot & View**.

Blank screen awaiting latest photo

Latest photo, including EXIF information, appears instantly

To download photos taken in Shoot & View mode to the App folder or to your iOS device camera roll:

1. Press the open-in button to display the function menu.
2. Press **Download To App Folder** to download it from Wi-Fi SD to the App for playback when not connected to the Wi-Fi SD device.

Or

Press **Download To App Folder** to download it from the Wi-Fi SD card to the iOS device camera roll.

Using the Wi-Fi SD App on Android Devices

When your Android device and Wi-Fi SD card are connected wirelessly in Direct Share or Internet Mode (via Internet hotspot or smartphone personal hotspot), you can browse content using the Wi-Fi SD App. The following sections provide instructions on how to view and playback your digital content using the App.

Launch App from the Android device

Wi-Fi SD App loading screen

Wi-Fi SD home screen
(When connected to the Wi-Fi SD card)

Wi-Fi SD home screen
(When not connected to the Wi-Fi SD card)

First Time Quick Setup

When the Wi-Fi SD App is launched for the first time while connected in Direct Share mode, the Quick Setup Wizard will appear and guide you through the Wi-Fi SD setup process. The quick setup guide appears on first use only, however you can change the settings and add an Internet hotspot at any time via the settings menu.

Tap **Yes** to start the Quick Setup Wizard

Step1. Modify the Wi-Fi SD SSID and Key or tap **Next** to skip this step

Step2. Add an Internet Hotspot SSID and security key, then tap **Next**

Step3. Tap **Save** to save the configuration

Browse Viewing Photos

1. From the Wi-Fi SD App home page, tap **Browse**.
2. Tap the photos icon  on the tool bar and select the desired photo to display.
3. Use your finger to swipe sideways through each photo as a slideshow or go back to the photo gallery and select the next desired photo.

Browse photo gallery, tap to select

Photo displayed in portrait mode

Playing Videos

1. From the Wi-Fi SD App home page, tap **Browse**.
2. Tap the videos icon  on the tool bar and select the desired video to view.
3. Choose one of the video player Apps installed on your device to play the video.

Note: If the selected App cannot play the file, please download and install a suitable video player App from Google Play.

Browse the video file list, tap to select

Choose an installed video player App to play the video

Opening Other File Types

Files stored on the Wi-Fi SD card that the Wi-Fi SD App does not support will be put into the **Others** section.

1. From the Wi-Fi SD App home page, tap **Browse**.
 2. Use your finger to swipe sideways to change to **Others**, and select the desired file.
 3. Choose one of the Apps installed on your device to open this file.
- Note:** If none of the installed Apps can open the file, please download and install a suitable App from Google Play. Different file types will show a different list of suitable Apps.

Browse Others file list, tap to open

Choose an installed App to open file

Downloading Files to Your Android Device

The Wi-Fi SD App allows you to select multiple files to download to the App folder for playback when not connected to the Wi-Fi SD card's wireless network.

1. From the photo gallery page, tap the select icon .
2. Select the desired files to download by tapping each photo or tap the Photo title bar to select all files.
3. Tap the download icon  on the tool bar to display the download menu and then tap **Download**. (To view files downloaded to the download folder, please see the next chapter on **Switch Between Wi-Fi SD/Local Mode** or check folder path: **sdcard\DCIM\WIFISD** on your Android device)

Select desired files from the photo gallery

Tap **Download** to download to the **sdcard\DCIM\WIFISD** folder

Switch between Wi-Fi SD/Local Mode

While browsing the photo and video file list, tap the menu button to switch between Wi-Fi SD and local mode. Any files downloaded to the Android device using the **Download** function are stored in the local directory: **sdcard\DCIM\WIFISD**.

Tap to view Local Directory

Tap to view the Wi-Fi SD Directory

The Wi-Fi SD App allows you to delete files when in **Local Mode**.

1. From the file list, tap the select icon .
2. Select the desired files to delete by tapping the check box next to each file.
3. Tap the delete button  and then tap **Delete** to delete the file.

Tap the select icon and select files

Tap **Delete** to delete the files

Share Photos Directly to Facebook/Twitter/Flickr/Sina Weibo

Note: You must be a registered Facebook/Twitter/Flickr/Sina Weibo user to use this function. Facebook App / Sina Weibo App must be installed first. (Requires: Facebook App version 1.9.10 / Sina Weibo App version 3.3.5 or later)

1. To share photos on Facebook/Twitter/Flickr/Sina Weibo, tap the **Select** button

in the file list. Tap the check box next to each photo that you want to share.

2. Tap the share button  and then choose a social networking service.

Note: the **Share** button only appears in **Internet Mode**

3. On first time use only, the authorization screen will appear. Please login to your account and authorize the Transcend Wi-Fi App.

(For Facebook users, tap **Allow All** on the Facebook permission request screen.)

4. Type a comment for the selected photos, and then tap **Upload**.

5. For Facebook, the photo will be uploaded to the album “**Transcend Wi-Fi SD**” in your Facebook account.

For Twitter/Sina Weibo, the photo will be posted in a tweet/weibo.

For Flickr, the photo will be uploaded to your photostream.

Select desired photos from the photo gallery and tap the **Share** button

Select the social networking service you wish to share photos to

Login and Authorize your Facebook account to share photos

Login and Authorize your Twitter account to share photos

Login and Authorize your Flickr account to share photos

Login and Authorize your Sina Weibo account to share photos

Share Photos via Other Apps

1. To share photos via other Apps, tap the desired photo from the file list.
2. Tap the share button  and then tap **Others**.

Note: the **Share** button only appears in **Internet Mode**

3. Tap an available App installed in your Android device.
4. The desired photo will automatically be attached to the selected App.

Tap the **Others** button

Tap an App to attach desired photo

Shoot & View

Shoot & View allows you to view the latest photo taken with your camera on your Android device instantly.

From the home screen, tap **Shoot & View**.

To download photos taken in Shoot & View mode to the download folder **sdcard/DCIM/WIFISD**:

1. Press the download button  to display the function menu.
2. Press **Download** to download it from the Wi-Fi SD card to the download folder for playback when not connected to the Wi-Fi SD device.
3. To display the EXIF information while viewing the latest photo, tap the menu button and select **Show EXIF**.

Tap the menu key and select **Show EXIF**

EXIF information displayed

Settings

Note: You must turn the camera off and back on to save any changes.

1. From the home screen, tap **Settings**.
2. Enter administrator username and password.

Note: The default username and password are both **admin** (all lower case)

3. Tap **Done** or **Login** to access Wi-Fi SD Settings.

Enter admin details on iOS device

iOS device Wi-Fi SD Settings menu

Enter admin details on Android device

Android device Wi-Fi SD Settings menu

Switch Connection Mode

While connected via Direct Share or Internet Mode, the Wi-Fi SD app allows you to easily switch Wi-Fi connection modes.

1. Tap the connection mode you would like to change to and tap **Apply**. The new Wi-Fi SD connection mode will take effect immediately.
2. Go to the Wi-Fi connection settings of your iOS or Android device.
 - If switching to Direct Share: connect to the Wi-Fi SD card SSID.

Or

 - If switching to Internet Mode: connect to the available Internet hotspot that you setup previously in the Wi-Fi SD Internet Mode settings.

Note: By default, the Wi-Fi SD card will automatically enter Direct Share mode each time the camera is powered on. To switch default startup mode to Internet Mode using the Wi-Fi SD App, see **Wi-Fi Options**.

Switch Connection Mode on iOS device

Switch Connection Mode on Android device

Wi-Fi Options

Note: Please upgrade the Wi-Fi SD card firmware to version 1.3 or later to enable this function.

Default Mode lets you choose whether the Wi-Fi SD card's wireless network signal will automatically broadcast in Direct Share or Internet Mode each time the camera is powered on.

Wi-Fi Options on iOS device

Wi-Fi Options on Android device

If no wireless connection to the Wi-Fi SD card exists after startup, Turn Off Wi-Fi allows you to turn off its Wi-Fi function after the selected time and work as a normal SDHC memory card. This can help to save camera battery life. The camera must be powered off and back on to re-enable the Wi-Fi function.

Note: This function works on startup only. If there is a connection to the Wi-Fi SD card after startup, the Wi-Fi function will never turn off, even if the Wi-Fi connection is lost.

Direct Share Settings

To configure basic wireless settings, tap **Direct Share Settings**.

WPA2 wireless security is enabled by default (Default Key '12345678'). It is recommended that you change the default SSID and Key to differentiate your Wi-Fi SD card from others that may be transmitting in your area.

Note: The SSID / Key must be at least 8 characters long and no more than 32 characters. All ASCII characters are acceptable.

Direct Share settings on iOS device

Direct Share settings on Android device

Internet Mode Settings

To enable the Wi-Fi SD card to connect to the Internet through an Internet hotspot, tap **Internet Mode Settings**. The Wi-Fi SD card can save the details of up to 3 Internet hotspots. When in range, the Wi-Fi SD card will connect to one of the available hotspots in order of priority, starting with Hotspot 1.

Internet Mode settings on iOS device

Internet Mode settings on Android device

1. **SSID:** Enter the SSID of the Internet hotspot you want to connect to.
2. **Security Key:** Enter the Internet hotspot security key.
3. Tap **Apply** to save the new Internet hotspots.

Set Administrator Password

This function allows you to set an administrator username and password to prevent unauthorized users from changing any Wi-Fi SD card settings.

Security settings on iOS device

Security settings on Android device

1. From the **Settings** menu tap **Security Settings**.
2. Enter a new username and password for the administrator account.
Note: Username: 5-12 characters. Password: 3 -12 characters.
3. Tap **Apply** to save the new username and password.

Wi-Fi SD Information

Wi-Fi SD Information displays the total capacity, available capacity, MAC, IP Address and Firmware version of the Wi-Fi SD card.

From the settings menu tap **Wi-Fi SD Information**.

Wi-Fi SD information on iOS device

Wi-Fi SD information on Android device

Connecting to the Wi-Fi SD Card using Other Devices

To wirelessly access digital content on your laptop, smartphone, or tablet:

1. **Direct Share:** On your Wi-Fi enabled device, use the Wi-Fi connection settings to search and connect to the Wi-Fi SD card's dedicated wireless network.
2. Once connected, launch an Internet browser and type “**wifisd**” or “**192.168.11.254**” into the browser address bar.
3. Enter administrator username and password.

Note: The default username and password are both **admin** (all lower case)

4. You will now be able to see the home screen of the Wi-Fi SD card, where you can view and download photos and videos from the Wi-Fi SD card, change Wi-Fi SD card settings, and view Wi-Fi SD information.

Note: You must turn the camera off and back on to save any changes.

Information

The screenshot displays the web interface of a Transcend Wi-Fi SD card network device. The header includes the Transcend logo and the slogan 'Set your photos free'. The main content area is titled 'Information' and is divided into four sections: LAN, Firmware, Wireless, and Wireless Client. Each section contains a table of network-related data.

LAN		
MAC Address	B8:38:29:00:56:77	
IP Address	192.168.1.1	
Subnet Mask	255.255.255.0	

Firmware	
Version	V0.4.3-20-00069507 (V138)
Build Date	2012-07-11 16:05:48

Wireless	
Mode	Direct Share
Name (SSID)	WiFiSD
Channel	6

Wireless Client		
Host Name	IP Address	Mac Address
Transcend	192.168.1.50	00:27:11:5f004e

Internet browser Wi-Fi SD card Network Device Information

- LAN** - MAC address, IP Address and Subnet Mask.
- Firmware** - Firmware version and Build Date.
- Wireless** - Wi-Fi SD Card Mode, SSID, and Channel.
- Wireless Client** - The Host name, IP and Mac address of the Wi-Fi devices connected to the Wi-Fi SD.

Upgrading Firmware

Each time the Wi-Fi SD App is launched while connected to the Wi-Fi SD Card; it will check your card's firmware version. If a newer version is available, a popup message will notify you.

For Windows/Mac user, please download Wi-Fi SD Firmware Update Tool (Windows/Mac ver.) to upgrade firmware. Please go to <http://www.transcend-info.com/Support/No-401> to download it.

IMPORTANT: To prevent data loss, it is recommended that you backup your data to another location before upgrading the firmware of your Wi-Fi SD card.

Troubleshooting

1. I can't see the Wi-Fi SD network on my device.

A: Check that Wi-Fi connectivity is enabled on your device. Also, please check the power status of your camera. The Wi-Fi signal cannot be launched when camera battery level is too low. Additionally, if the default startup mode is set to Internet Mode then the Wi-Fi SD card will first search for the hotspots listed in the Internet Mode Settings before automatically switching to Direct Share Mode. Please wait around one minute for the network to appear.

2. I can't connect wirelessly to the Wi-Fi SD network.

A: Turn your camera off, reinsert the Wi-Fi SD card, and then power on the camera. Please also check the number of devices currently connected to the Wi-Fi SD card. The Wi-Fi SD card can connect to up to 3 devices at the same time.

3. I forgot the username and password. How do I access Wi-Fi SD settings?

A: Please update firmware to reset defaults. The default username and password are both reset to **admin** (all lower case)

4. How do I turn off the Wi-Fi SD card?

A: Simply turn off your camera. All Wi-Fi SD card functions will be disabled.

5. How many devices can connect to Wi-Fi SD simultaneously?

A: Up to 3 devices can connect to the Wi-Fi SD card at the same time.

6. Can the Wi-Fi SD card work in my camera?

A: Please go to <http://www.transcend-info.com/Products/Compatibility/> for an up-to-date list of compatible cameras.

7. Wi-Fi SD connection speed is slow.

A: Wireless performance depends on environment and distance from device or hotspot. To obtain the best possible connection speed, you can experiment with the following:

- Make sure your camera has adequate power.
- Try adjusting the location and orientation of the Wi-Fi SD card.

8. Can I change the default photo download path for my Android device?

A: Tap the More button  from the App home screen and select Preference to edit the default download path of your Android device.

Get more help

If you can not find the answer to your problem in this manual and are having difficulty with the Wi-Fi SD card or App, please visit our Tech Support website at http://www.transcend-info.com/Support/contact_form

Specifications

Dimensions	32mm (L) × 24mm (W) × 2.1mm (H)
Weight	2g
Network Interface	Wi-Fi 802.11b/g/n
Wi-Fi Encryption	WEP/WPA/WPA2*
Operating Voltage	2.7V~3.6V
Operating Temperature	0°C (32°F) to 60°C (140°F)
Certificates	CE, FCC, BSMI
Warranty	Two-year Limited

*In Direct Share mode, the Wi-Fi SD card only supports WPA2 encryption.

FCC Compliance & Advisory Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:

1. this device may not cause harmful interference and
2. this device must accept any interference received, including interference that may cause undesired operation of the device.

FCC RF Radiation Exposure Statement

This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Warning: A shielded-type power cord is required in order to meet FCC emission limits and also to prevent interference to the nearby radio and television reception. It is essential that only the supplied power cord be used. Use only shielded cables to connect I/O devices to this equipment.

NCC 警語

第十二條：經型式認證合格之低功率射頻電機，非經許可，公司、商號或使用者均不得擅自變更頻率、加大功率或變更原設計之特性及功能。

第十四條：低功率射頻電機之使用不得影響飛航安全及干擾合法通信；經發現有干擾現象時，應立即停用，並改善至無干擾時方得繼續使用。

前項合法通信，指依電信法規定作業之無線電通信。低功率射頻電機須忍受合法通信或工業、科學及醫療用電波輻射性電機設備之干擾。

Transcend Limited Warranty

This product is covered by a Two-year Limited Warranty. Should your product fail under normal use within two years from the original purchase date, Transcend will provide warranty service pursuant to the terms of the Transcend Warranty Policy. Proof of the original purchase date is required for warranty service. Transcend will inspect the product and in its sole discretion repair or replace it with a refurbished product or functional equivalent. Under special circumstances, Transcend may refund or credit the current value of the product at the time the warranty claim is made. The decision made by Transcend shall be final and binding upon you. Transcend may refuse to provide inspection, repair or replacement service for products that are out of warranty, and will charge fees if these services are provided for out-of-warranty products.

Limitations

Any software or digital content included with this product in disc, downloadable, or preloaded form, is not covered under this Warranty. This Warranty does not Apply to any Transcend product failure caused by accident, abuse, mishandling or improper usage (including use contrary to the product description or instructions, outside the scope of the product's intended use, or for tooling or testing purposes), alteration, abnormal mechanical or environmental conditions (including prolonged exposure to humidity), acts of nature, improper installation (including connection to incompatible equipment), or problems with electrical power (including undervoltage, overvoltage, or power supply instability). In addition, damage or alteration of warranty, quality or authenticity stickers, and/or product serial or electronic numbers, unauthorized repair or modification, or any physical damage to the product or evidence of opening or tampering with the product casing will also void this Warranty. This Warranty shall not apply to transferees of Transcend products and/or anyone who stands to profit from this Warranty without Transcend's prior written authorization. This Warranty only Applies to the product itself, and excludes integrated LCD panels, rechargeable batteries, and all product accessories (such as card adapters, cables, earphones, power adapters, and remote controls).

Transcend Warranty Policy

Please visit www.transcend-info.com/warranty to view the Transcend Warranty Policy. By using the product, you agree that you accept the terms of the Transcend Warranty Policy, which may be amended from time to time.

Online registration

To expedite warranty service, please access www.transcend-info.com/Support/registration to register your Transcend product within 30 days of the purchase date.

End-User License Agreement (EULA)

Software license terms and conditions

1. **Generally.** Transcend Information, Inc. ("Transcend") is willing to grant the following license to install or use the software and/or firmware ("Licensed Software") pursuant to this End-User License Agreement ("Agreement"), whether provided separately or associated with a Transcend product ("Product"), to the original purchaser of the Product upon or with which the Licensed Software was installed or associated as of the time of purchase ("Customer") only if Customer accepts all of the terms and conditions of this Agreement. PLEASE READ THESE TERMS CAREFULLY. USING THE SOFTWARE WILL CONSTITUTE CUSTOMER'S ACCEPTANCE OF THE TERMS AND CONDITIONS OF THIS AGREEMENT. IF YOU DO NOT AGREE TO THE TERMS AND CONDITIONS OF THIS AGREEMENT, DO NOT INSTALL OR USE THE LICENSED SOFTWARE.

2. **License Grant.** Transcend grants to Customer a personal, non-exclusive, non-transferable, non-distributable, non-assignable, non-sublicensable license to install and use the Licensed Software on the Product in accordance with the terms and conditions of this Agreement.

3. **Intellectual Property Rights.** As between Transcend and Customer, the copyright and all other intellectual property rights in the Licensed Software are the property of Transcend or its supplier(s) or licensor(s). Any rights not expressly granted in this License are reserved to Transcend.

4. **License Limitations.** Customer may not, and may not authorize or permit any third party to: (a) use the Licensed Software for any purpose other than in connection with the Product or in a manner inconsistent with the design or documentations of the Licensed Software; (b) license, distribute, lease, rent, lend, transfer, assign or otherwise dispose of the Licensed Software or use the Licensed Software in any commercial hosted or service bureau environment; (c) reverse engineer, decompile, disassemble or attempt to discover the source code for or any trade secrets related to the Licensed Software, except and only to the extent that such activity is expressly permitted by applicable law notwithstanding this limitation; (d) adapt, modify, alter, translate or create any derivative works of the Licensed Software; (e) remove, alter or obscure any copyright notice or other proprietary rights notice on the Licensed Software or Product; or (f) circumvent or attempt to circumvent any methods employed by Transcend to control access to the components, features or functions of the Product or Licensed Software.

5. **Copying.** Customer may not copy the Licensed Software except that one copy of any separate software component of the Licensed Software may be made to the extent that such copying is necessary for Customer's own backup purposes.

6. **Open Source.** The Licensed Software may contain open source components licensed to Transcend pursuant to the license terms specified as below,

- (a) GNU General Public License (GPL), the terms of which is currently available at <http://www.gnu.org/licenses/gpl.html>;
- (b) GNU Lesser General Public License (LGPL), the terms of which is currently available at <http://www.gnu.org/copyleft/lesser.html>; and/or
- (c) Code Project Open License (CPO), the terms of which is currently available at <http://www.codeproject.com/info/cpol10.aspx>.

The above license terms will control solely with respect to the open source components. In the event that this Agreement conflicts with the requirements of the above one or more terms with respect to the use of the corresponding open source components, Customer agrees to be bound by such one or more license terms.

7. **Disclaimer.** TRANSCEND MAKES NO WARRANTY AND REPRESENTATIONS ABOUT THE SUITABILITY, RELIABILITY, AVAILABILITY, TIMELINESS, LACK OF VIRUSES OR OTHER HARMFUL COMPONENTS AND ACCURACY OF THE INFORMATION, LICENSED SOFTWARE, PRODUCTS, SERVICES AND RELATED GRAPHICS CONTAINED WITHIN THE LICENSED SOFTWARE FOR ANY PURPOSE. ALL SUCH INFORMATION, LICENSED SOFTWARE, PRODUCTS, SERVICES AND RELATED GRAPHICS ARE PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND. TRANSCEND HEREBY DISCLAIMS ALL WARRANTIES AND CONDITIONS WITH REGARD TO THIS INFORMATION, LICENSED SOFTWARE, PRODUCTS, SERVICES AND RELATED GRAPHICS, INCLUDING ALL IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, WORKMANLIKE EFFORT, TITLE, AND NON-INFRINGEMENT.

IN NO EVENT SHALL TRANSCEND BE LIABLE FOR ANY DIRECT, INDIRECT, PUNITIVE, INCIDENTAL, SPECIAL, CONSEQUENTIAL DAMAGES OR ANY DAMAGES WHATSOEVER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF USE, DATA OR PROFITS, ARISING OUT OF OR IN ANY WAY CONNECTION WITH THE USE, PERFORMANCE OR ACCURACY OF THE LICENSED SOFTWARE OR WITH THE DELAY OR INABILITY TO USE THE LICENSED SOFTWARE, OR THE PRODUCT WITH WHICH THE LICENSED SOFTWARE IS ASSOCIATED, WHETHER BASED ON CONTRACT, TORT, NEGLIGENCE, STRICT LIABILITY OR OTHERWISE, EVEN IF TRANSCEND HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

8. **Limitation of Liability.** IN ANY CASE, TRANSCEND 'S LIABILITY ARISING OUT OF OR IN CONNECTION WITH THIS AGREEMENT WILL BE LIMITED TO THE TOTAL AMOUNT ACTUALLY AND ORIGINALLY PAID AT RETAIL BY CUSTOMER FOR THE PRODUCT. The foregoing Disclaimer and Limitation of Liability will apply to the maximum extent permitted by applicable law. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so the exclusions and limitations set forth above may not apply.

9. **Termination.** Transcend may, in addition to any other remedies available to Transcend, terminate this Agreement immediately if Customer breaches any of its obligations under this Agreement.

10. **Miscellaneous.** (a) This Agreement constitutes the entire agreement between Transcend and Customer concerning the subject matter hereof, and it may only be modified by a written amendment signed by an authorized executive of Transcend. (b) Except to the extent applicable law, if any, provides otherwise, this Agreement will be governed by the law of the Republic of China, excluding its conflict of law provisions. (c) If any part of this Agreement is held invalid or unenforceable, and the remaining portions will remain in full force and effect. (d) A waiver by either party of any term or condition of this Agreement or any breach thereof, in any one instance, will not waive such term or condition or any subsequent breach thereof. (e) Transcend may assign its rights under this Agreement without condition. (f) This Agreement will be binding upon and will inure to the benefit of the parties, their successors and permitted assigns.

GNU General Public License (“GPL”) Disclosure

Firmware incorporated into this product and/or software used for this product may include third party copyrighted software licensed under the GPL (hereinafter referred to as “GPL Software”). In accordance with the GPL, if applicable: 1) the source code for the GPL Software may be downloaded at no charge or obtained on CD for a nominal charge by calling Customer Support within three years of the date of purchase; 2) you may copy, re-distribute and/or modify the GPL Software under the terms of the GNU General Public License as below or any later version, which may be obtained at <http://www.gnu.org/licenses/gpl.html>; 3) the GPL Software is distributed WITHOUT ANY WARRANTY, without even implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. The entire risk as to the quality and performance of the GPL Software is with you. Transcend does not provide any support for the GPL software.
