

Industrial PLP SSDs

Empower Intelligent Automation

Tailored for high-performance manufacturing applications, Transcend's embedded SSDs are available with our Power Loss Protection (PLP) technology. This cutting-edge feature serves as a safeguard, ensuring the preservation of critical data integrity and seamless operations, even in the face of sudden power outages. Elevate the level of data protection in smart factories with Transcend's industrial-grade PLP SSDs, setting new benchmarks for reliability and uninterrupted performance.

Optimized Performance

Built-in DRAM-cache and LDPC ECC algorithms prevent data corruption.

Improved Durability

30 μ m PCB gold fingers, corner bond & anti-sulfur technologies help endure environmental extremes.

Comprehensive Product Line

Various form factors and interfaces for different systems and applications.

Featured Products

PCIe M.2 2280

MTE712P

PCIe M.2 2280

MTE662P

SATA III M.2 2280

MTS952P

SATA III 2.5"

SSD470P

SATA III mSATA

MSA452P
